

Instructions | Part#: 4-54230

John Deere, Condenser Performance Kit

Fits John Deere Models: 4040, 4040 Euro, 4230, 4240, 4240S, 4430, 4440, 4630, 4640 Tractors

1. Evacuate the A/C system.
2. Slide the original condenser out for easier access.
3. Disconnect the #6 high side line from the original condenser.
4. Install #8 hose included in kit from original condenser to #8 fitting on the auxillary condenser.
NOTE: Before installing any lines add 1-2 oz. of pag or ester oil to auxillary condenser.
5. Attach auxillary condenser to the front side of original condenser with mounting straps included in the kit.
6. Reconnect original #6 hose to adapter hose on auxillary condenser. *(Refer to picture below)*
7. Vacuum down system and recharge to estimated capacity of 3lbs - 3.5lbs.
