

Bobcat Radiator & Mounting Bracket Revision

Due to high failure rates on radiators in some Bobcat skidsteer models, Bobcat has made changes and are retro fitting a new version radiator and bracket. Replacement radiators AR9331, AR9332, and AR9340 include a bracket that is compatible with all applicable models.

For Bobcat skidsteers with the new or old style radiator and bracket, the replacement radiators will bolt in.

Old style radiator with bracket mounted to core side plate:
